CA 0489 A	MM, 8 Fiber Cable

Optical Fiber Splice Closures for Ribbon cable

It protects fiber optic splicing point in various installation conditions such as wires, manholes, ducts and direct buried. It is specially designed for accommodates plenty of iron cable and applicable to multi branching installation and complying with the requirements in each point of network.

The flat type gasket ensures reliable sealing performance by preventing air and water leak and the corn type sealing socket provides easy and reliable installation.

- 100% water proof using silicon gasket
- Firm cable gripping by double cable sheath holder
- Capability of multi-core management
- Use of various cable diameter, various branching and multi environments
- Designed by stable fiber bending radius
- Tight joined cable sheath for work efficiency.

ITEM

CL 0296 A

Size	600 x 340 x 225mm (outer)	470 x 270 x 210mm (inner)
Weight	8 kg	
Inlet Ports	6	
Cable Diameter	8 Dia - 27 Dia	
No. of Splice Tray	6	
Splice Capacity	Single-216C (Max, 432C)	Ribbon-1944C (12C ribbon)
Splice Method	Fusion, Mechanical	
Splice Protector	Heat Shrinkable Sleeve, Mechanical Splicer	

Optical Fiber Splice Closures for FTTH

It protects fiber optic splicing joint in various installation conditions such as wires, manholes, ducts. It is specially designed for FTTH network and applicable to multi branching installation complying with the requirements in each point of network.

- The Ribbed body has high mechanical strength environmental impact and compression
- The tray is able to accommodate RN and heat shrinkable sleeve together
- One flat gasket and the external screws provide excellent tightness reliability
- The closure can be installed in the pole and manhole with provided hangers

Specification:

Size - 270 x 160 x 80mm

Inlet ports - 4
Cable Diameter - 3 Dia - 10 Dia
No of Splice Tray - 2
Splice Capacity - 24C (Max. 48C)
Splice Method - (Fusion, Mechanical, Connector)

Product Code

Item Description

CL 0289 A

Fiber Optic Splice Closure for FTTH

Optical Fiber Splice Closures for FTTx

It protects fiber optic splicing joint in various installation conditions such as aerial, manholes, ducts. It is applicable to multi branching installation by using Mid-plate for increasing core capacity and complying with the requirements in each point of network.

The flat type gasket ensures reliable sealing performance by preventing air and water leak and the cone type sheath gasket is available to accommodate varying size of cable diameter.

- The closure has an air valve on its cover for checking air pressure drop
- The ribbed body has high mechanical strength against impact and compression
- The splice tray is applicable for both loose tube and ribbon fiber management
- The LAP ground connector and wire are offered for grounding metallic OSP cables
- The cone type sealing socket is adjustable to fit any diameter cable

Specification:

ITEM	CL 0290 A	CL 0291 A	CL 0292 A
Size	435X205X113mm	435X205X167mm	435X205X221mm
Weight	2.8 kg	3.8 kg	4.8 kg
Inlet Ports	4 (Max, 32)	8 (Max, 64)	12 (Max, 96)
No of Splice Tray	4	6	8
Splice Capacity	96C (Max, 192C)	144C (Max, 288C)	192C (Max, 384C)
Splice Method	(Fusion, Mechanical, Connector)		
Adapter Capacity	12EA	24, 48EA	

Optical Fiber Splice Closures for FTTx

It is specially designed for specific FTTx network environment, developed for multi-branch and multi purpose, and which is suitable for 8-branching or multi branching installation by using multi-branching gaskets in case of FTTx network installation.

- Protection against impact and compression
- Tight water proof by using silicon rubber sheath gasket
- Variable gasket, variable installations

Specifications Summary

ITEM	CL 0293 A
Size	435 x 205 x 113mm
Weight	2.8 kg
Inlet Ports	8 (Max, 32)
Cable Diameter	3 Dia - 20 Dia
No.of Splice Tray	4
Splice Capacity	96C (Max, 192C)
Splice Method	Fusion, Mechanical, Connector
Splice Protector	Heat Shrinkable Sleeve, Mechanical Splicer

Optical Fiber Splice Closure

It protects fiber optic splices in various installation conditions such as aerial, manholes, ducts and pole mounts. It provides fast and easy no-cost re-entry by using plastic clips that have high mechanical and environmental features and also provides reliable sealing performance. with its six entry ports, the closure is applicable to in-line or mid-span branching method.

- Reliable moisture-tight casing with silicon sealing
- Ribbed body structure against impact and compression
- Compact and light weight
- Various branching method including mid span branching
- Both loose tube ribbon management possible
- 6 plastic clips provide speedy, convenient and reliable work

Specifications Summary

ITEM	CL 0294 A
Size	542 x 243 x 150mm
Weight	4.5 kg
Inlet Ports	6
Cable Diameter	8 Dia - 29 Dia
No. of Splice Tray	6
Splice Capacity	144C (Max, 288C)
Splice Method	Fusion, Mechanical
Splice Protector	Heat Shrinkable Sleeve, Mechanical Splicer

Optical Fiber Splice Closure

It protects fiber optic splicing point in various installation conditions such as aerial, manholes, ducts and direct buried. The flat type gasket ensures reliable sealing performance by preventing air and water leak and the various sheath gasket provides easy and reliable installation, with its eight ports and various sheath gasket, the closure is applicable to various applications.

- 100% water proof using silicon gasket
- Ribbed body structure against impact and compression
- Capability of multi-core management
- Use of various cable diameter, various branching and multi environments
- Both loose tube ribbon management possible

ITEM	CL 0295 A
Size	559 x 242 x 135mm
Weight	4.5 kg
Inlet Ports	8
Cable Diameter	3 Dia - 24 Dia
No. of Splice Tray	6
Splice Capacity	288C (Max, 576C)
Splice Method	Fusion, Mechanical
Splice Protector	Heat Shrinkable Sleeve, Mechanical Splicer

Optical Fiber Splice Closure BS604A

It protects fiber optic splices while providing fast and easy no-cost re-entry. It can be installed on aerial, in manholes, ducts and mounted on poles. The closure provides reliable sealing performance, and fiber splicing point protected in a ribbed polypropylene dome that has high mechanical and environmental features. With its six entry ports, the closure is applicable to in-line or mid-span branching method.

- Reliable moisture-tight housing with hot melt type sealing
- Ribbed body structure protects against impact and compression
- Efficient fiber management by splice tray holding structure
- Easy to use for closure assembly
- Easy clamping of tension member and grounding

ITEM	CL 0297 A	CL 0297 B	CL 0297 C
Size	522 x 211 x 174mm	522 x 211 x 174mm	577 x 211 x 174mm
Weight	2 kg	2 kg	2.5 kg

Cable Diameter	8 Dia - 24 Dia	8 Dia - 24 Dia	8 Dia - 24 Dia
No. of Splice Tray	4	4	4
Splice Capacity	48C (Max, 48C)	48C (Max, 48C)	96(Max, 192C)
Splice Method		Fusion, Mechanical	
Splice Protector		Heat Shrinkable Sleeve, Mechanical	
Splicer			

Fiber Optic Splice Closure

It protects fiber optic splices while providing fast and easy no-cost re-entry. It can be installed on aerial, in manholes, ducts and mounted on poles. The closure provides reliable sealing performance, and fiber splicing point protected in a ribbed polypropylene dome that has high mechanical and environmental features. With its seven entry ports, the closure is applicable to in-line or mid-span branching method.

- Reliable moisture-tight housing with hot melt type sealing
- Ribbed body structure protects against impact and compression
- Efficient fiber management by splice tray holding structure
- Easy to use for closure assembly
- Easy clamping of tension member and grounding

ITEM	CL 0298 A
Size	525 x 252mm
Weight	3.5 kg
Inlet Ports	7
Cable Diameter	8 Dia - 30 Dia
No. of Splice Tray	12
Splice Capacity	288C (Max, 576C)
Splice Method	Fusion, Mechanical
Splice Protector	Heat Shrinkable Sleeve, Mechanical Splicer

Fiber Optical Splice Closures for aerial line

It protects fiber optic splices in installation conditions such as aerials. It is designed for the aerial line especially and provides the safety by using catch clips and the reliable sealing performance in low pressure environment for maintain and the beauty of the town by supplying the operating environment according to the suitable design for pole and no splicing of cable.

- Development of the operating environment y not surplus the cable spool
- Reduction of the working hour and safety by using one touch handle clip
- Reliable sealing performance in low pressure environment
- Fiber optic protection, prevention, of tube break-off and insurance against risk of bend
- Double structure of sheath gasket and sheath holder
- Prevention from vibration, movement by using aerial hanger to fix closure and aerial line together

ITEM	CL 0299 A	CL 0299 B
Size	525 x 203 x 154mm	420 x 180 x 100mm
Weight	5 kg	2.5kg
Inlet Ports	6	6
Cable Diameter	8 Dia - 18 Dia	3 Dia - 20 Dia
No. of Splice Tray	6	3
Splice Capacity	144C (Max, 288C)	72C (Max, 144C)

OTDR-MTS-8000

MTS-8000 is a compact and portable optical network tester with flexible scalable platform. The key feature is its industry leading size and weight. It is remotely controlled (via Ethernet, Fiber)

With the MTS-8000's scalable design, companies can match testing solutions of their unique network environments by purchasing only the features needed. This platform maximizes scalability, manageability, price/performance and flexibility.

The powerful communication capability of the MTS-8000 test platform offers users the ability to remotely control the unit, send data directly to the office, or access the data via internet.

Fiber Characterization testing

- Optical Time Domain Reflectometer (OTDR)
- Chromatic Dispersion (CD)
- Polarization Mode Dispersion (PMD)
- Attenuation Profile (AP)
- Loss testing

OTDR Module

- More than 20 OTDR modules
- Combined wavelengths MM:850/1300
SM:1310/1383/1550/1625 nm
- Dynamic range 30DB upto 50DB

Product Code	Product Description
OT 0010 B	OTDR MTS-8000 Complete set with carry case

OTDR

MTS-6000 is a compact and light weight test platform designed for the installation and maintenance of fiber networks. It provides field service technicians with the highest levels of performance and upgradeability on the market today.

Modular in design, MTS-6000 offers an extensive portfolio of test functionality with over 40 different fiber modules supporting a wide range of applications. The versatility of the MTS-6000 allow technicians to standardize using one type of test equipment and then introduce new testing capabilities in the field without incurring additional costs

Since the MTS-6000 is compatible with our existing fiber module product line, technicians can exchange plug in modules between the MTS-8000, Multiple Network Test Platform and the MTS-6000. To ensure the highest return on your test equipment existing OTDR modules from the MTS-5100 can be transformed (with extension) for use with the MTS-6000

Product Code	Product Description
OT 0010 A	OTDR MTS-6000 Complete set with carry case

Ribbon Fusion Splicer-FSM-60R

The main advantage of this is its compact size and movable monitor

It is used upto 12-fiber ribbon splicing.
Cladding alignment with fixed v-grooves.
Environmental resistant features.
Arc-calibration free system.
4.1" TFT color LCD monitor.

Dual directional operation system
Long life battery.

Software upgrade via internet.
Detachable work table
(Attached to carry case)
Over 100 splicing modes
Splicing time is 20 sec.

- Over 40 application modules already supported
- Dynamic range above 45 db
- Wavelengths (1310, 1550, 1625nm)
- More flexibility future testing needs
- Unprecedented speed and power

Product Code	Product Description
FU 0008 A	Ribbon fusion splicer-FSM 60R

Fusion Splicer FSM-60S

A number of improvements have been added to the performance proven Profile Alignment System (PAS) platform, resulting in the smallest and the lightest package of its kind. With improved splice tube heat time, the splicing operation is the world's fastest truly optimised for the field use. Other valuable features include an ergonomic design. The movable monitor and dual-direction operating system essentially gives the operator choice of two splicers. With these features, the FSM 60S is now more than a tool.

- Core to Core fiber alignment system PAS
- 9 sec splice time and 35 sec tube-heat time
- Dual-directional operating system
- Arc calibration free system
- Large capacity slot-in batteries

Product Code	Product Description
FU 0006 B	FUSION SPLICER FSM-60S

Optical Fiber Instruments

Single Fiber Fusion Splicer DVP-730

- Digital colour display.
- Reversible monitor with control panel on each side
- Max. wind velocity of 15m/s
- 9 sec. splice time, 40 sec. tube-heat time
- Compact & light weight
- Simultaneous X and Y views
- Large capacity internal battery
- Store 8000 groups of splice results
- Auto check end face
- Auto calibration parameters

Product Code	Product Description
FU 0005 B	FUSION SPLICER DVP-730 – SINGLE MODE

Cable and Antenna Analyser

This cable and antenna analyzer is a light weight portable diagnostic tool that accurately detects operational problems in the infrastructure of the base station and repeaters.

It has all of the measurement functions necessary to accurately characterize the site's antenna system, including Voltage Standing Wave Ratio (VSWR), Distance To Fault (DTF), cable loss and power measurements.

Frequency range is from 40MHz to 4.0GHz

Rechargeable and field replaceable Lithium-ion-Battery

It is easy to use, equipped with touch panel colour display allowing rapid measurements and obtaining results clearly displayed. Its application specific software allows the user to compare and analyze measurements and generate professional reports.

Product Code	Product Description
CA 1233 B	Cable and Antenna analyzer complete set

Optical Fiber Instruments

Power Meter

Industry's first auto-zeroing function provides outstanding accuracy with no manual zeroing necessary.

Illuminated graphical user interface displays all necessary parameters and upto 3 test results simultaneously.

Upto 900 calibrated wavelengths for the highest performance range in the industry.

A large storage capability for upto 1000 results with automatic date/time stamp.

A usb port for remote operation as well as easy microsoft excel based report generation and analysis

A unique power supply management system on the market with 4 different ways of powering units

A robust, shock-proof and splash-proof design for field operation

Product Code	Product Description
PO 0046 A	Power meter 780-1600nm, -70 to +20dbm sm-mm
PO 0045 A	Power meter 1310/1490/1550 nm sm

Light Source

Laser source with upto four wavelengths offers flexibility in singlemode and multimode applications.

The available nominal wavelengths are 1310 and 1550nm.

Nominal output power is -7.0 dbm to 0 dbm, separately adjustable.

High output level stability due to built in optical isolator and optical power control.

Powered by 4 dry batteries mignon/AA, operating time is above 45 hours.

The instrument switches off automatically after 20 min.

Product Code	Product Description
LI 0006 B	Single mode light source 1310/1550nm, universal adapter

Optical Fiber Instruments

Visual Fault Finders

Used to quickly locate bending loss and breaks in optical fibers, and to identify bad connectors.

- 635nm red laser makes fiber breaks and bending losses easily visible.
- Stable, Calibrated output.
- Continuous and blinking wave output
- Optional AC power converter/Adapter available for bench top or prolonged use.
- Rugged and splash proof.
- Available with FC/PC or MTRJ adapters.
- Range upto 3 KM
- More than 30 hours of continuous operation

Product Code	Product Description
VI 0005 A	FC/PC, 3 KM, SM, MM
VI 0006 A	MT-RJ, 1 KM, MM

Visual Fault Finder

Fiber breaks, microbends and poor optical splices are clearly visible as light glows through the fiber buffer or outer jacket.

- Rugged metal housing, pen size-format.
- Light weight.
- Universal push-pull interfaces (up to) for 2.5mm and 1.25mm.
- Visible laser light at 635 nm.
- Usable with single mode and multi mode fibres
- Range upto 5 km.
- Operates for over more than 45 hours.

Product Code	Product Description
VI 0007 B	Pen size visual fault locator

Bare Fiber Adapter

Allows temporary connection of 125 micron multimode or single mode fiber to measuring equipments. Includes a durable 2.5mm tungsten carbide ferrule and a ferrule cleaning tool.

Product Code	Product Description
BA 0003 A	125 mm, FC style connector

Optical Fiber Instruments

Single Mode Loss Tester

Packaged to operate in specific fiber applications, accurate attenuation measurements in minimum Wavelength range is about 800 - 1625nm Source has stable, Calibrated output and rugged to easy use.

Product Code	Product Description
LO 0016 A	Loss test with charger adapter

Multifunction Loss Tester

This multifunction loss test set offers a highly versatile handheld test instrument which has been specially developed in response to those industry standards

Easy-to-use all-in-one prepackaged kit
FTTx ready by integrating dedicated wavelengths (1310/1490/1550) for PON testing as well as an optimised test sequence for increased field productivity
0.01db display resolution

Product Code	Product Description
LO 0039 A	Multi function loss test set with(soft carry case,adapter)

Fiber Micro Scope

Product Code	Product Description
MI 0009 A	200 X Microscope
MI 0010 A	400 X Microscope

Optical Fiber Instruments

Fiber Identifier

Interchangeable head for ribbon, jacketed and coated fibers allow virtually any fiber to be identified.

Product Code	Product Description
FI 0009 A	Range - (0 , -40 dBm)
FI 0010 A	Range - (0 , -40 dBm) with relative power
FI 0008 A	Range - (+20 , -20 dBm)

Fiber Talk set

Clear digital voice transmission
Hands free operation
Rugged casing

Product Code	Product Description
TA 0002 B	1550nm, 45db
TA 0002 A	1310nm, 30db

Fiber Optic Couplers

Product Code	Product Description
CO 0161 A	SM, 1 x 2 Coupler
CO 0162 A	SM, 1 x 4 Coupler
CO 0163 A	SM, 1 x 8 Coupler
CO 0158 A	MM, 1 x 2 Coupler
CO 0159 A	MM, 1 x 4 Coupler
CO 0160 A	MM, 1 x 8 Coupler

Wavelength Division Multiplexer

Two different wavelength carrying different information is coupled to a single fiber. Increases the efficiency of the network. It is available in different standard connectors and wavelengths. Widely used in Telecommunication, CATV networks

Product Code	Product Description
WA 0022 A	980/1550 1 x 2 multiplexer
WA 0023 A	980/1550 2 x 2 multiplexer
WA 0018 A	1310/1550 1 x 2 multiplexer
WA 0019 A	1310/1550 2 x 2 multiplexer
WA 0020 A	1480/1550 1 x 2 multiplexer
WA 0021 A	1480/1550 2 x 2 multiplexer

Test Fiber

Test fiber is a spool of Optical fiber with a length ranging from 300 meter to 5 kilometer length in a box. This is used for accurate OTDR & other optical fiber measurements. A standard test fiber at the beginning of a fiber span will protect the actual fiber from falling into the dead zone of the instrument.

Used to remove the "dead zone" from OTDR measurements

Used as calibration comparison for OTDR measurements

Single mode or Multi mode fiber available.

Can be terminated with any style connector.

Impact and crush resistant packing.

Product Code	Product Description
TE 0014 A	SM 300 M Test fiber box
TE 0013 A	SM 1000 M Test fiber box
TE 0015 A	SM 5000 M Test fiber box
TE 0011 A	MM 300 M Test fiber box
TE 0010 A	MM 1000 M Test fiber box
TE 0012 A	MM 5000 M Test fiber box

Optical fiber Attenuators

Plug type fixed attenuators

In-line type fixed attenuators

APPLICATIONS

- Telecommunication network
- CATV networks
- Local Area Network
- Active device termination
- Data system networks

FEATURES & BENEFITS

- Compliant with : JIS C-5973, IEC
- 100% factory tested
- High power endurance
- Modal Noise
- Low polarization Insensitive
- Convenience and compact design
- Low price

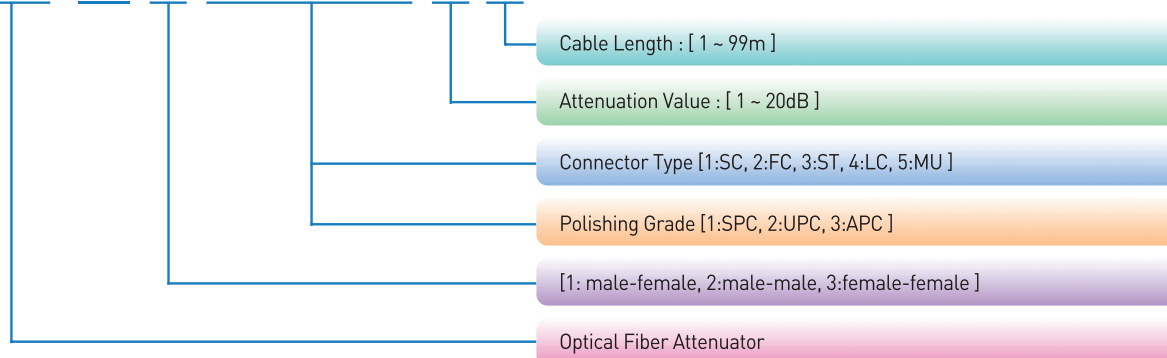

SPECIFICATION

(Unit :dB)

Characteristics	Conditions	Value		
		Min	Typ	Max
Attenuation			1 ~ 10	
			15, 20	
Return Loss	SPC	40	45	
	UPC	50	55	
	APC	60	65	
Attenuation Accuracy	1 ~ 10dB			±0.5
	15, 20dB			±1.0
Operating Wavelength(nm)	1310 and 1550(1650)			
Operating Temperature	-40℃ ~ +80℃			
Humidity	75℃, RH 95%			

ORDERING INFORMATION

OFAT-SM-□-□/□-□/□-□-□

APPLICATIONS

- Receiver padding
- Lab or field and installation
- System testing and installation
- Optical power equalization

FEATURES & BENEFITS

- Wide attenuation range
- Precise resolution
- Low polarization dependent loss
- Low insertion loss
- Customer-specified attenuation range
- Low back-reflection

SPECIFICATION

Type	Patch Type	Plug-In Type

Patch Panel

>>> FEATURES & BENEFITS

- Design registration (FSC-FSP-24P)
- construct level CAT.5E high speed network
- 19-inch RACK standard design, easy to be set up
- This technology is just for the internal standard residence / business building of precincts correspondence line equipment
- Every PORT use the discern icon
- Easy to numbering

OTP

>>> APPLICATIONS

- Construct the FTTH network
- Size: 320 × 245 × 85mm
- total weight: about 1.4kg
- Faucet: 2
- outlet: 16

>>> FEATURES & BENEFITS

- The simple design can fix the member mark
- Convenient in locale work
- Convenient in locale work
- Load light splitter
- It can protect thin light cable and pipeline light cable
- It is made by the high rigidity plastic material, use the front and back of the inside tray, it can contain 2 RN splitter and 16 light outside line at the most
- It can be constructed on the electric poles or exterior wall of buildings

Splice Trays

>>> APPLICATIONS

- For use with indoor or outdoor splice hardware
- Telecommunication networks
- CATV Networks Local Area Network
- Active Device Termination
- Data System Networks

>>> FEATURES & BENEFITS

- Craft-friendly design
- Available for many splicing methods
- Used for multi-mode or single-mode systems
- Low excess loss & High performance
- Retractable splicing tray
- Convenience and ease of handling
- Low price

Tensile Strength	Max: 0.25Kg, Less than 0.5dB, Avg: Less than 0.3dB
Coupling Method	Push-on Method

Ferrule Inspection Scope

Aerotech's new line of variable magnification inspection microscopes all have a standard magnification range of 150X - 400X. All units supplied with FC/PC, SC/PC and 2.5mm patch cord viewing tips as standard, with optional tips available for LC,MU,SC/APC, FC/APC, E2000 and other connectors. Software for all units runs on standard Windows operating system.

Laser Fault Locator

FEATURES & BENEFITS

- Locates breaks, bends even through jacketed fibers
- Troubleshoots faults within OTDR dead zone
- End-to-end fiber identification
- Small size, pocket tools

Power source	LD
Wavelength	650nm
Output power	5dBm(3mw)
Fiber identified distance	>5 km
Output interface	Multi-function (SC.FC.ST.LC)
Usage temperature	-10℃ ~ +50℃
Storage temperature	-20℃ ~ +80℃
Weight1	58g
Length	167mm
Diameter	16mm
Continuous worktime	16H

PLC Splitter (Planar Lightwave Circute Splitter)

Fig. 1. 1x4 and 1x8 splitter

Fig. 2. 1x16 splitter

Fig. 3. 1x32 splitter

APPLICATIONS

- FTTx Systems
- LAN, WAN and Metro Networks
- Analog/Digital Passive Optical Networks
- CATV Networks
- Other applications in fiber optic systems

FEATURES & BENEFITS

- Compact designing
- Low insertion loss and low PDL
- High reliability
- High channel counts
- Wide wavelength range
- Large operating temperature range
- Customized packaging and configuration

APPLICATIONS

- U.S. Navy shipboard, surface craft and submarines
- Mission critical combat and communications systems
- Mobile tactical shelters electronic battlefield networks
- Mobile Emergency Telecommunications (MET) stations
- Deployable outdoors in harsh environments

FEATURES & BENEFITS

- Precision machined to MIL-PRF-28876, Rev. E specification
- Available in 3 shell sizes: 13 (4 ch), 15 (6, 8 ch), 23 (18, 31 ch)
- Six keying options (plus universal keying for COTS product) for both plugs and receptacles
- Inserts are interchangeable from plug to receptacle. Either can be operated with pins or socket termini
- Fully intermediate with all qualified M28876 connectors
- Operates with all qualified single mode or multi mode M29504/14 and /15 termini
- Complete line of straight, 45 degree and 90 degree back shells
- COTS version available

Optical Fiber Distribution

Cabinet rack consists of multiple cassette modules providing splicing, distribution and storage function. The 2200 mm cabinet can accommodate multiple modules that are equivalent to more than 1000 fiber connections. It provides more capacity and flexibility for all of your fiber optic needs. The modular design offers high compatibility and easy maintenance providing reliable operation for interconnecting outside plant fiber optic cable with fiber optic equipment.

- Jumper cord guide to identify jumper cord from each module
- Easy identification and distribution
- Wide work space for efficient cable management
- Maintain continuous transmission quality
- Individual module access

Low Density Cabinet Rack

Low density cabinet rack is designed to make free connection and distribution between optical line and transmission equipment. It provides much easier work, efficient operation system and high speed optical information and communication.

- Jumper cord guide to identify jumper cord from each module
- Easy identification and distribution
- Wide work space for efficient cable management
- Maintain continuous transmission quality
- Individual module access
- Safe arrangement of cable regardless of movement

Size	900 x 600 x 2200mm

Optical Fiber Laying Accessories

Fiber Blowing Machine

The cable blowing machine, comprising an air box and cable pusher, has been designed to provide an effective and safe method of fiber optic cable installation.

The system installs fiberoptic cable of 6mm (0.25") to 32mm (1.25") overall diameter, at speeds up to 90m/min (300ft/min), into pre-installed ducts. The system operates on the viscous drag principle employing compressed air to install the cable, controlled and assisted by a belt drive system.

The cable is propelled by compressed air, fed into the duct on venturi principle, while the hydraulically powered belt drive system controls the fiberoptic cable. The electronic monitoring system provides read out of speed and distance, gives protection against duct obstructions and includes an emergency stop facility.

The system is mounted on an anti corrosion treated, sturdy, height adjustable, wheeled, tubular steel trolley. This allows the unit to be wheeled around on site. Power is provided by the C-1200 hydraulic petrol driven power pack.

Cable Blowing Machine is supplied with sub duct clamps, duct seal collets, cable collets assembly and cable seals to suit any size cable and duct.. Including a hydraulic power and connecting hoses. The machine is ready to commence cable blowing with the addition of an appropriate air compressor.

Features

Fully labeled control panel containing:

- Power on/off button
- Emergency stop button
- Reset button
- Combined length counter recording in metres (feet) and cable speed read out in metres/min (feet/min)
- Hydraulic pressure read out dial
- Air pressure read out dial
- Hydraulic on/off control valve
- Adjustable speed control for drive belts
- Air supply control on/off with automatic exhaust function
